

Functions

- This app provides disaster information to international visitors. The Japan Tourism Agency launched the app in October 2014 with the aim of creating an environment in which international visitors can travel around Japan - a country that experiences a number of natural disasters - with a feeling of greater security.
- It provides push notifications concerning Earthquake Early Warnings, Tsunami Warnings, Weather Warnings and Eruption Notices issued in Japan. In addition, there is an action flowchart and a communication card, along with useful links that provide information in times of disaster.
- **Supported languages: 5 languages**
English, Simplified Chinese, Traditional Chinese, Korean and Japanese
- **Fee: Free**
- **Information is shown as push notifications**
Earthquake Early Warnings, Tsunami Warnings, Weather Warnings, Eruption Notices, Heatstroke Information, and civil protection information such as the launch of ballistic missiles.

Push Notifications

Actions to Take

Language can be selected through an in-app setting button

Shows seismic intensity of earthquakes in surrounding area

Provides visual representation of disasters' originating and current locations
